Presents:

The Art and Science of Achieving Possibility: "Cracking the Code"

This workshop is designed to provide the necessary steps to achieving success in every area of your life!

In this workshop you will be guided through a process of uncovering the how and why behind what makes you "tick" in the world. What you will discover about yourself during this journey will surprise and inspire you to achieve the success you have only dared to dream of. **Yes, it is possible** and happens in a very concise and powerful process designed to crack the code of living from old perceptions that hold you back.

A major key to obtain what you deeply desire in life is to clear out and let go of your old, unwanted behaviors and negative stories that limit your full self expression. These need to be replaced with powerful new declarations that shape new possibility for your future. You will be amazed at what these cutting edge distinctions can do to facilitate dynamic new changes in your personal and professional life.

By participating in this program, you will:

- Receive tools and direction on how to live your life from your vision and passion
- Produce practical grounded next steps in areas where you are stuck, dissatisfied or desire to take yourself to the next level of success.
- Clearly identify the difference between your default mood (standard operating mode) and a mood of declaring who you are and how you want to live your life!
- Powerful focus and thinking practices to help you clarify and manifest on the spot.

Date: June 25, 2011

Price: \$275.00
